ForPlay® Personal Lubricants were introduced by TRIMENSA in 1980 after researching sexually transmitted disease deterrents for over a five year period. ForPlay® were the first water based personal lubricants to be manufactured to Pharmaceutical Standard for quality assurance. The ForPlay® line is a gel lubricant with a wonderful slick, smooth texture and good lubricity. ForPlay® lubricants are all water based, condom compatible, non-staining and they leave no residue on the skin.

ForPlay® Succulents® were the original flavored personal lubricants introduced in 1985 to promote the use of condoms during oral sex. However, this popularity grew as customers found more and more ways to utilize the wonderful taste and aromas. ForPlay® Succulents® were originally presented in over twenty-one flavors (in the original 5.25oz iconic bottle) to meet the most epicurean of tastes. Today the number of the **Succulents**® have been narrowed to the five top sellers in a 2.2oz re-sealable tube for easy travel. These are the same original great flavors with a slight warmth when blown on, rubbed on and allowed the ample playfulness.. Succulents Suddenly... You're Delicious!

ForPlay® Lube DeLuxe® is not simply a new version of an old formula. It is a breakthrough in personal lubricant formulation. ForPlav® Lube DeLuxe® redefines the standard by which water based lubricants are measured. Its luxurious, silky smooth texture combined with VERY long lasting lubricity will extend fun and pleasure. ForPlay® Lube DeLuxe® is water based, condom compatible, nonstaining and washes off leaving no residue on the skin. ForPlay® Lube DeLuxe® . . "the pure pleasure of personal luxury".

PrePair® Spermicidal lubricant with 1% NONOXYNOL-9 is a water based lubricant, manufactured to Pharmaceutical Standards and FDA requirement for your quality assurance. Recommended for use with diaphragms or condoms for added personal protection. PrePair® is a water based formula that will supplement the body's natural moisture.
